

**Sri Lanka Institute of Information Technology**  
**Software Architecture – Assignment 1**  
**Year3, Semester 1 – 2025**

**Group Id: SE3030\_WE.SE.01.02**

**Details of the Group Members:**

Student ID	Student Name	Student Contribution
IT22303684	Abeygunasekara D.T	Test report producer and the technician consumer
IT22251114	Jinad Induwithwa A.G	Appointment producer, patient consumer and main menu consumer
IT22371768	Ranasinghe S.I	Chemical producer, Medical Rep consumer and Login producer
IT22182678	Rashani K.G.M	Lab test producer and Lab assistant consumer

## **Description of the scenario**

With producer-consumer implementation, we developed a medical laboratory management system based on the OSGi (Open-Source Gateway Initiative) framework. Easy Way is a medical laboratory which patients can test their health and get lab reports. Our medical lab consists of three tiers, a service tier in which bundles act as producers (appointment producer, chemical producer, test report producer lab test producer and login producer), a controller tier where bundles act as both producers and consumers (patient consumer, lab assistant consumer, medical rep consumer and technician consumer) and a presentation tier which act as the main consumer. (Main menu).

To use these functionalities, we must first import and install all the required packages. To begin importing packages, we must first import the OSGi framework package into both the producer and consumer manifests. After that, we must first export producer packages in the producer manifest before we can establish the connection between the producer and the consumer. Then in the consumer manifest, we must import all the producer's exported packages.

### **1. Main menu**

This is the main consumer which connects all the other consumers that act as a consumer. This main menu provides common interfaces for all the consumers.

### **2. Appointment Producer**

Patient, lab assistant and technician can access this server directly. So, patient can add appointment, search appointment, and get appointment bill. Lab assistant can view all appointments and search appointments. Technician can view appointments and search appointments.

### **3. Chemical Producer**

Medical rep can access this server. Medical rep can add new chemicals, view all chemicals, view selected chemicals, update chemical details, and generate chemical bill.

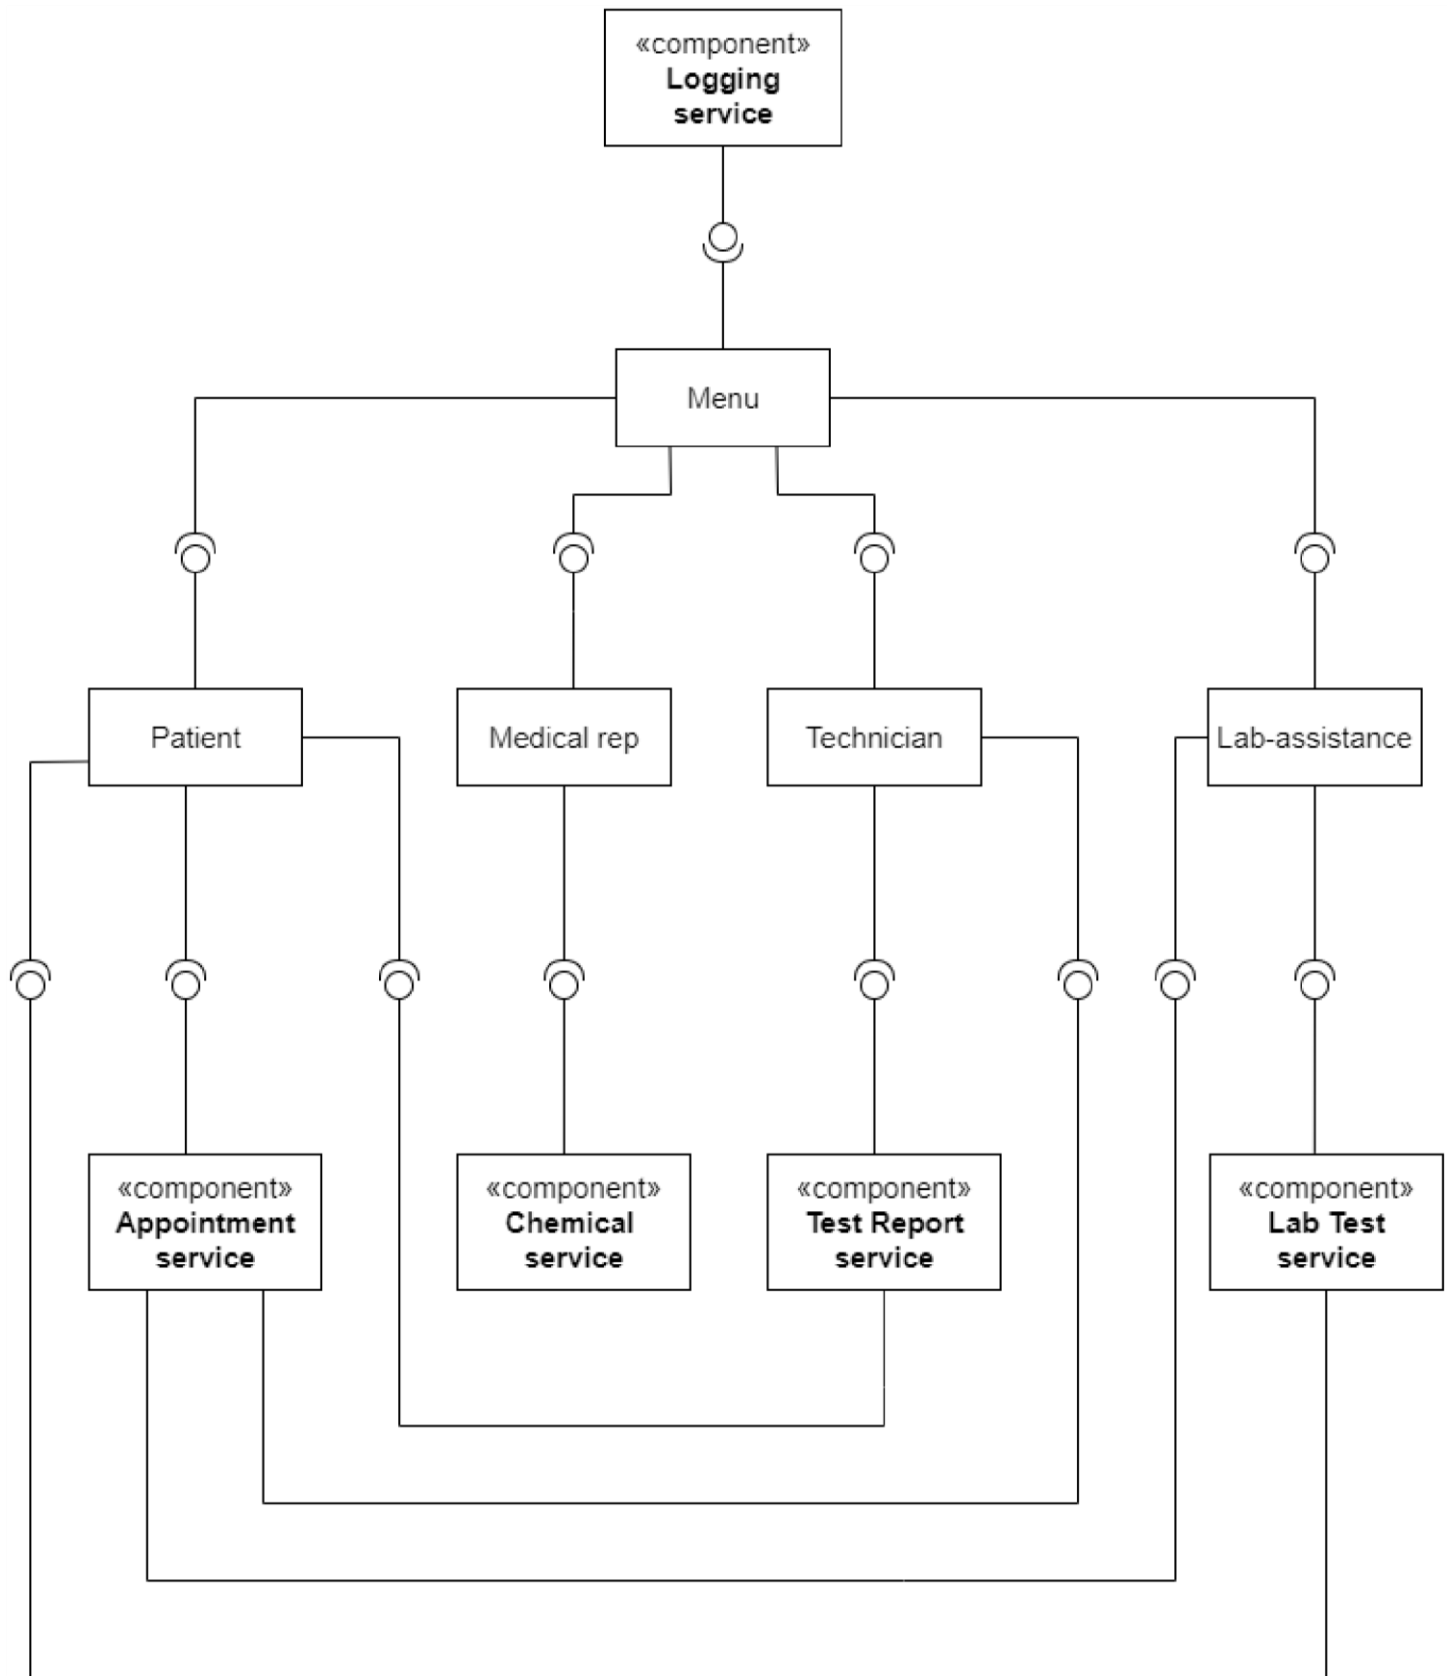

### **4. Lab Test Producer**

This lab test server can be accessed by lab assistant and patient. Lab assistant can add lab tests, view all the lab tests, search for a selected lab test and update lab test. Patient can also view available lab tests.

### **5. Test Report Producer**

Test report producer can be accessed by patient and technician. Patient can view his or her test report. Technician can view all the test reports and search test reports.

## Diagrammatic overview

# Implementation of bundles in manifest files

## Appointment Producer

```
AppointmentProducer ×
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: AppointmentProducer
4 Bundle-SymbolicName: AppointmentProducer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: appointmentproducer.AppointmentProducerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: AppointmentProducer
9 Import-Package: org.osgi.framework;version="1.3.0"
10 Bundle-ActivationPolicy: lazy
11 Export-Package: com.lab.AppointmentProducer
12
```

## Patient Consumer

```
PatientConsumer ×
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: PatientConsumer
4 Bundle-SymbolicName: PatientConsumer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: patientConsumer.PatientConsumerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: PatientConsumer
9 Import-Package: com.lab.AppointmentProducer,
10 com.lab.LabTestProducer,
11 com.lab.TestReportProducer,
12 org.osgi.framework;version="1.3.0"
13 Bundle-ActivationPolicy: lazy
14 Export-Package: patientConsumer
15
```

## Chemical Producer

```
ChemicalProducer x
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: ChemicalProducer
4 Bundle-SymbolicName: ChemicalProducer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: chemicalproducer.ChemicalProducerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: ChemicalProducer
9 Import-Package: org.osgi.framework;version="1.3.0"
10 Bundle-ActivationPolicy: lazy
11 Export-Package: com.Lab.ChemicalProducer
12
```

## Medical Rep Consumer

```
MedicalRepConsumer x
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: MedicalRepConsumer
4 Bundle-SymbolicName: MedicalRepConsumer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: medicalRep.MedicalRepConsumerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: MedicalRepConsumer
9 Import-Package: com.Lab.ChemicalProducer,org.osgi.framework;version="1.3.0"
10 Bundle-ActivationPolicy: lazy
11 Export-Package: medicalRep
12
```

## Lab Test Producer

```
LabTestProducer x
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: LabTestProducer
4 Bundle-SymbolicName: LabTestProducer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: Labtestproducer.LabTestProducerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: LabTestProducer
9 Import-Package: org.osgi.framework;version="1.3.0"
10 Bundle-ActivationPolicy: lazy
11 Export-Package: com.Lab.LabTestProducer
12
```

## Lab Assistant Consumer

```
LabAssistantConsumer x
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: LabAssistantConsumer
4 Bundle-SymbolicName: LabAssistantConsumer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: LabAssistant.LabAssistantConsumerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: LabAssistantConsumer
9 Import-Package: com.Lab.AppointmentProducer,
10 com.Lab.LabTestProducer, org.osgi.framework;version="1.3.0"
11 Bundle-ActivationPolicy: lazy
12 Export-Package: LabAssistant
13 |
```

## Test Report Producer

```
TestReportProducer ×
1 Manifest-Version: 1.0
2 Bundle-ManifestVersion: 2
3 Bundle-Name: TestReportProducer
4 Bundle-SymbolicName: TestReportProducer
5 Bundle-Version: 1.0.0.qualifier
6 Bundle-Activator: testreportproducer.TestReportProducerActivator
7 Bundle-RequiredExecutionEnvironment: JavaSE-17
8 Automatic-Module-Name: TestReportProducer

14
```

## **Installing bundles**

### **Appointment Producer and Patient Consumer**

- 1)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/AppointmentProducer.jar
- 2)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/PatientConsumer.jar

### **Chemical Producer and Medical Rep Consumer**

- 1)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/ChemicalProducer.jar
- 2)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/MedicalRepConsumer.jar

### **Lab Test Producer and Lab Assistant Consumer**

- 1)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/LabTestProducer.jar
- 2)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/LabAssistantConsumer.jar

### **Test Report Producer and Technician Consumer**

- 1)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/TestReportProducer.jar
- 2)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/TechnicianConsumer.jar

### **Login Producer and Main menu Consumer**

- 1)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/LoginProducer.jar
- 2)install file:C:/Users/jinad/OneDrive/Desktop/SA/Jar\_File/MainMenuConsumer.jar

C:\Windows\System32\cmd.exe - java -jar bin/felix.jar
